Kickstart: Introduction to Incident Response elective course

This material is prepared for use in *Introduction to Incident Response elective course* and was prepared by Henrik Kramselund, `xhek@kea.dk`. It contains the very basic information to get started!

These course and exercises are expected to be performed in a training setting with network connected systems. The exercises use a number of tools which can be copied and reused after training. A lot is described about setting up your workstation in the Github repositories.

To get kickstarted in this course:

☐ Make sure you can login to Fronter https://kea-fronter.itslearning.com/
  Electronic version of this document will be uploaded here!

☐ Lecture plan for this course will be in Fronter
  (Source is also in Git https://github.com/kramse/kea-it-sikkerhed)

☐ Bookmark the main Github page: https://github.com/kramse/
  Note: there are two pinned repositories `security-courses` and `kramse-labs`

☐ Slides and exercises booklet – PDF will be in Fronter
  Source is in Github – feel free to clone or download single files
  https://github.com/kramse/security-courses/tree/master/courses/incident-response/intro-to-incident-response

☐ We will use virtual machines in teams of two persons, so check BIOS settings
  – make sure CPU settings have virtualisation turned ON

☐ Select and install virtualisation software

☐ Read about setup of exercise systems here
  https://github.com/kramse/kramse-labs

☐ Get the book Forensic Discovery, Dan Farmer and Wietse Venema! Either on paper or PDF
  You can download *for free*:
  http://fish2.com/security/

I hope we will have a fun and enjoyable time in this course.

Best regards

Henrik Kramselund, he/him
